BIOCARD™
BUILT FOR BUSINESS

MicroLatch™
Your Finger is the Key!

DO YOU KNOW WHO IS USING YOUR ACCESS CARD?

BIOCARD™ IDENTIFIES THE USER NOT JUST THE CARD!

Self Enrolling biocard™ is 'two cards in one' with
Patented 'dual' card platform

Works wherever Industry standard proximity, contact or contactless smart cards, and one time password systems are used; allows seamless integration with the existing infrastructure - no middleware, cabling or coding required

Custom, twin NFC chips for complete coverage of available encryption protocols

User controlled, customised security...with the choice of passive' and 'active' biometric identity on one card!

Biometric 'swipe' array for fast, positive ID

Designed to easily fit the standard CR80 printed identity card

'Built in' lanyard grips, no need for separate card holders

Power efficient with Micro USB charging port

Tri-colur LED for excellent user feedback

Rugged construction for extreme conditions
